

Copilot **Cowork** — Cheat Sheet

Your AI coworker in Microsoft 365 · keep this pinned

WHICH TOOL?

M365 Copilot	A quick answer or edit, in the flow of one app.
Cowork	A whole multi-step job you delegate across apps.
Scout	Ongoing, proactive help that comes to you.

Team layer: Copilot Studio & Power Automate — built once, for many.

MODEL & COST

- ▶ **Start on Auto** — picks the best model per task.
- ▶ **\$ Sonnet** — everyday work, best value (~\$4/task).
- ▶ **\$\$ Opus** — complex, high-stakes (~\$5).
- ▶ **\$\$\$ GPT / heavy** — deep work (~\$11).
- ▶ Type **/cost** to see credits spent.

GREAT PROMPT = 4 PARTS

- ▶ **Goal** — the outcome you want.
- ▶ **Context** — role, audience, why.
- ▶ **Sources** — the files, people, dates.
- ▶ **Format** — brief, table, email...

"Prep me for my 2pm" beats "help with my meeting."

STEAL THESE PROMPTS

Run my daily brief: calendar, emails that need me, top 3 priorities.

Prep me for my [time] meeting — invite, attendees, related docs, a briefing.

Read the contracts in [folder] and table each renewal date.

Save this as a skill called "[name]"; trigger on "[phrase]".

STAY IN CONTROL

- ▶ It **previews actions** — approve before it sends/posts.
- ▶ Outputs land in **OneDrive ▶ Cowork**.
- ▶ It only sees what **you** can already access.
- ▶ Turn repeat tasks into **Skills** to save credits.
